## WeRateDogs Insights

[WeRateDogs](#) is a twitter account created in 2015 that rates people's dogs with a funny comment about the dog. These ratings almost always have a denominator of 10. The numerators, though? Almost always greater than 10. 11/10, 12/10, 13/10, etc. Why? Because "[they're good dogs Brent.](#)" Almost every rating that is less than 10 is given to something other than an actual dog, another animal or a dog statue for example.

WeRateDogs have their own “dogtionalary”, pun intended, that explains the different stages of dog and some dog related words.

The various dog stages are included in this photo:

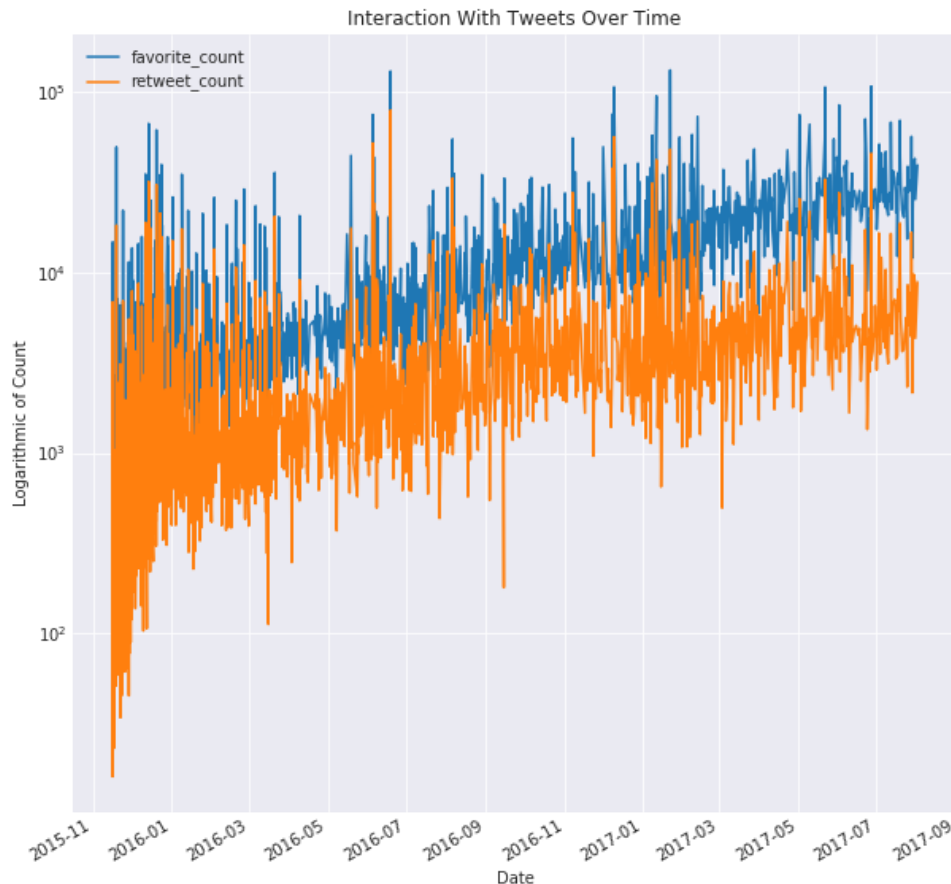

So, if you are a dog lover, WeRateDogs should be a must visit for you. And here we provide you with some insights into the account's tweets since its creation until Jun 2017, the dogs, and how other dog lovers interact with the account.

## SO, HOW MANY TWEETS WERE RANKING DOGS, AND HOW MANY WERE RANKING OTHER THINGS

From the 1969 tweets, 1553 tweets were ranking dogs and 416 tweets were ranking other animals, dog statues, etc. In fact, one of the tweets was a ranking of snoop dogg who is 420/10 if you know what I mean.

## AND HOW DID THE INTERACTION WITH THE TWEETS CHANGE THROUGH TIME?

We can see that the interaction with the tweets was on a steady increase over time, indicated by the rising trend in favorite and retweet counts, cuz everybody loves dogs.

## WHAT WAS THE BREED OF THE DOG WITH HIGHEST INTERACTION?

This one was hard, as they are all good boys, but if we were to judge on interaction by favorite count or number of retweets, we can make some conclusions.

So, the dog with the highest favorite count was either a Lakeland terrier, a Labrador retriever, or an Irish terrier.

And the dog with the highest number of retweets was either a Labrador retriever or a whippet.

Guess everyone loves the Labrador retriever.

## AND WHAT ABOUT DOG STAGES, HOW MUCH WERE DIFFERENT STAGES FEATURED IN THE TWEETS?

It wasn't always the case that WeRateDogs included the dog stage in their tweet, but from the times they did we can say there are a lot of puppers out there.

From the 303 tweets where they mentioned the dog stages, 201 times were puppers.

The second highest dog stage was doggo with only 63 tweets.

We can see the representation of the stages in those tweets in this photo, can you see the difference between pupper and the others?
